- The dashboard consists of a top navigation bar menu.
- The top navigation bar contain links to important sections like user management, configuration, support, and notifications.

7. Manage Users:

The "Manage users" section in the Captive Jobs Portal for administrators provides comprehensive tools to handle the management of native users, job seekers, and employers within the job portal. Here's an overview of the different management functionalities available:

- Access the "Manage Users" section in the top navigation menu of dashboard.

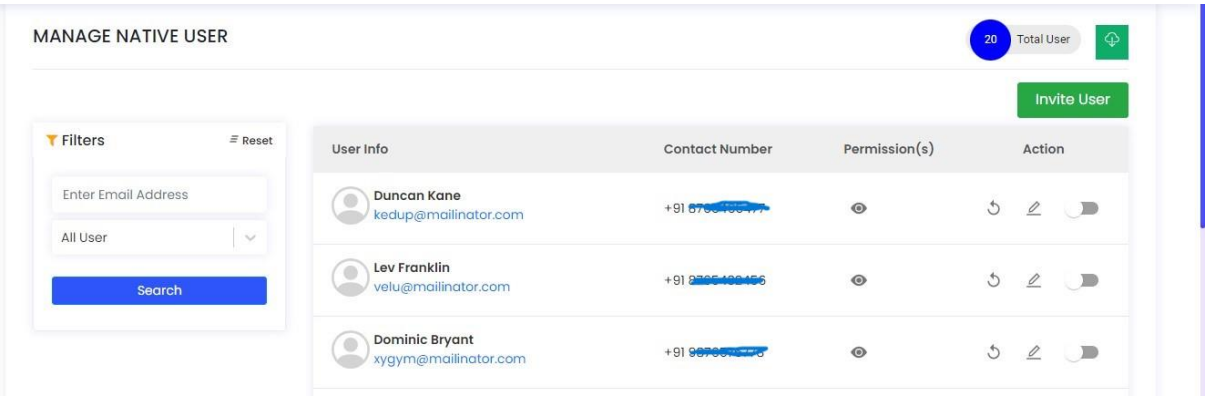

- From here you can manage the Native Users, Job Seekers, and Employers.

7.1 Manage Native Users:

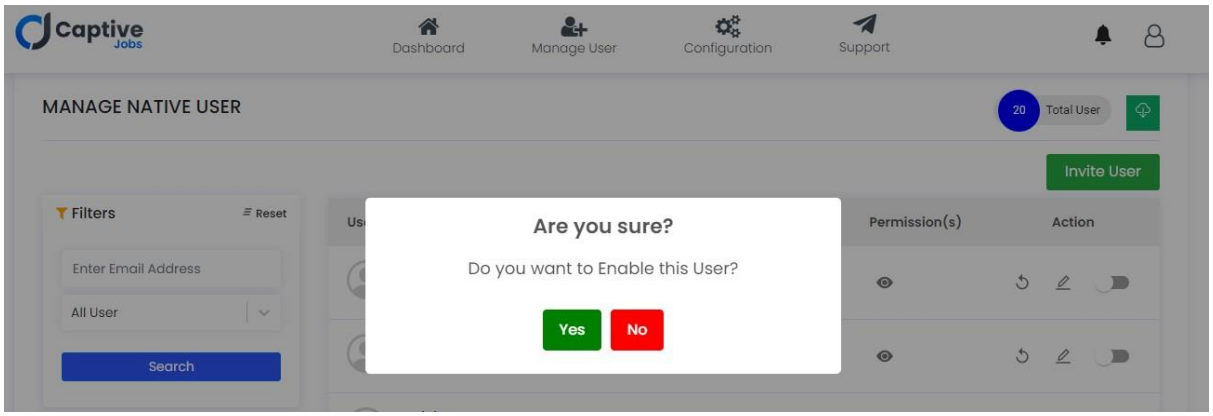

This section allows Super administrator to manage and registered the native users in the portal as an administrator. Admins can view and update user profiles, manage account settings, and perform actions like activating or deactivating user accounts.

As an Admin you can Manage the native user and can perform the below actions:

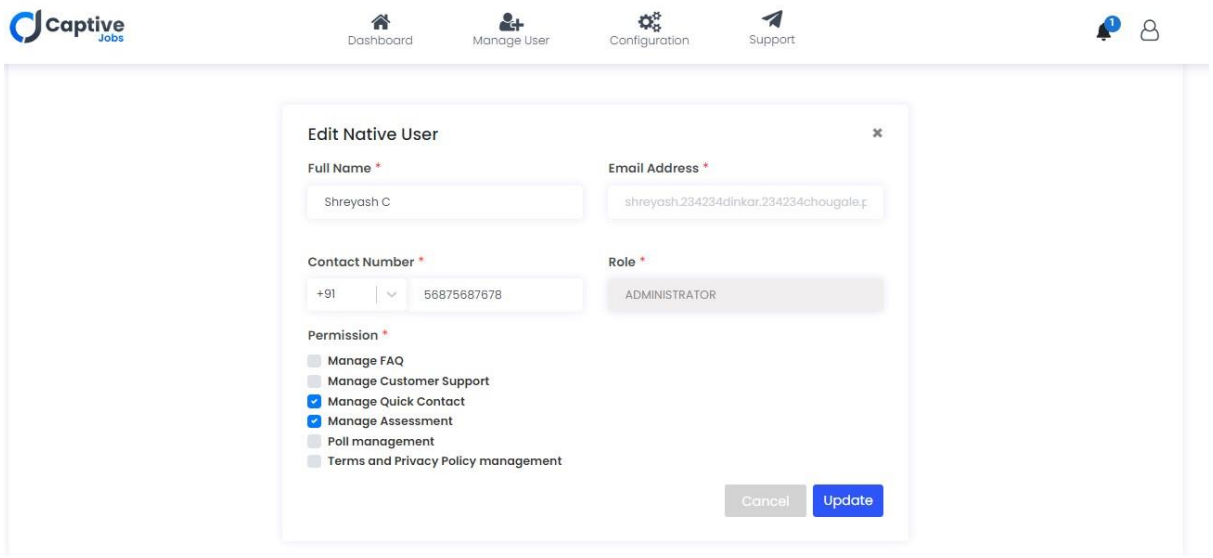

- View all the users.
- Can view the total count of native users.
- Can download the report of all the users on click of download icon next to the total count.

- Enable and disable all the native users.

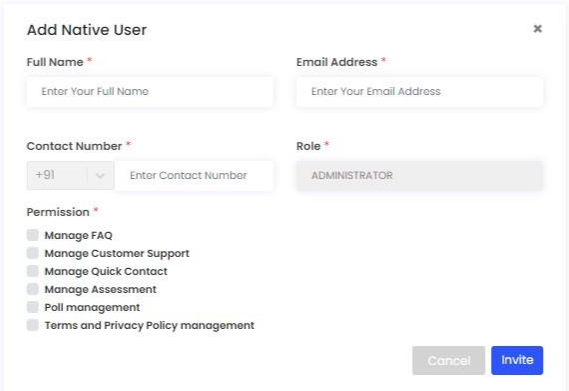

- Edit the users on click of edit icon.

1. Invite Native Users

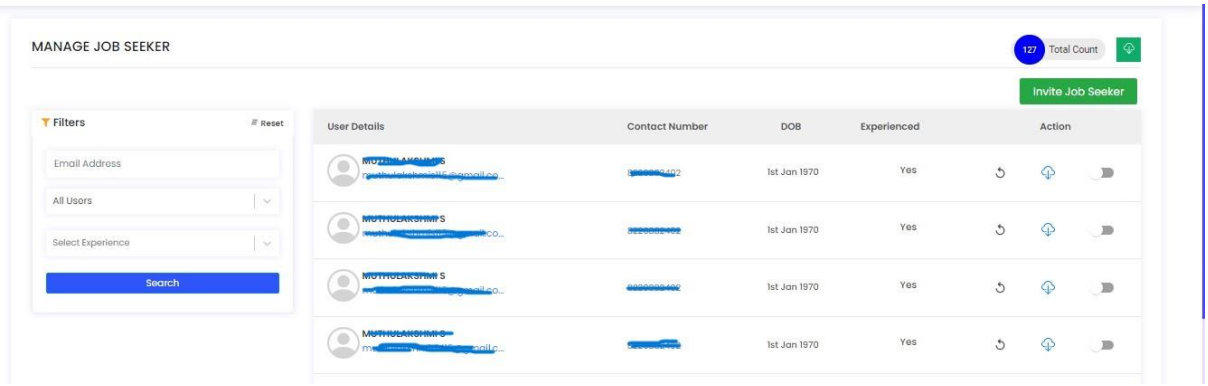

- Admin can add the native user in the system buy entering the mentioned details.
- Can also limit the access rights by checking the desired permission check box.

7.2 Manage Job Seekers

Administrators can manage job seekers profile and can register them into the system. As an Admin you can Manage the job seekers and can perform the below actions:

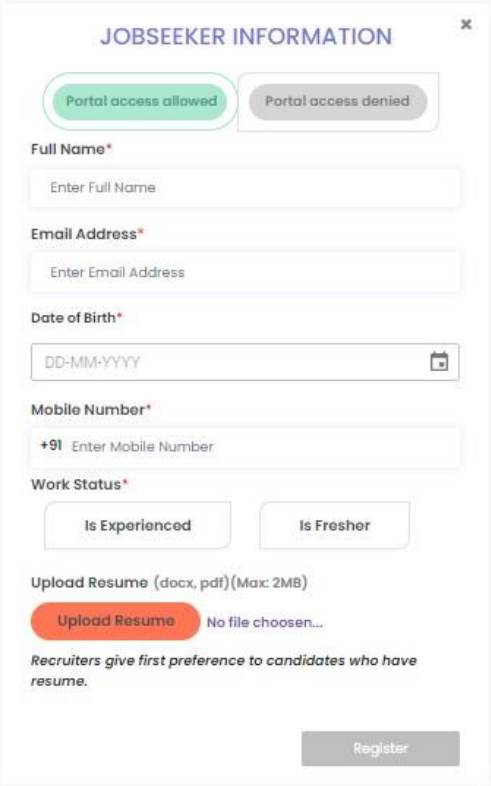

- View all the users. Here user can see the total count of all the jobseekers in the system.
- On click of email Id you can send and email to the respective user.

- Enable/disable the user by clicking on the radio button under actions.
- Download the resumes in the system by clicking on the download icon.
- Can also view the user by applying the filters as active or inactive user.
- Cam download all job seekers data by clicking on download icon next to the Total Count Icon.

1. Add Job Seekers

- Admin can register a job seeker into the system.
- Can choose to give access to the poral or can only add the user in the system.

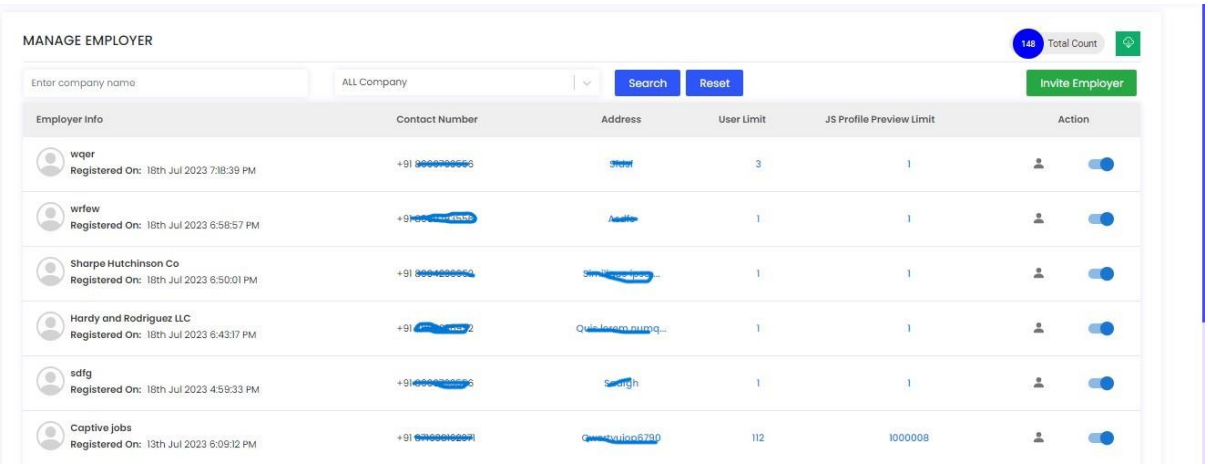

- Once the user is registered in the system and portal access is given, they will receive an email asking to activate their accounts.

7.3 Manage Employers

In the "Manage Employer" section, administrators can oversee the registration and management of employers on the portal.

As an Admin you can Manage the Employer and can perform the below actions:

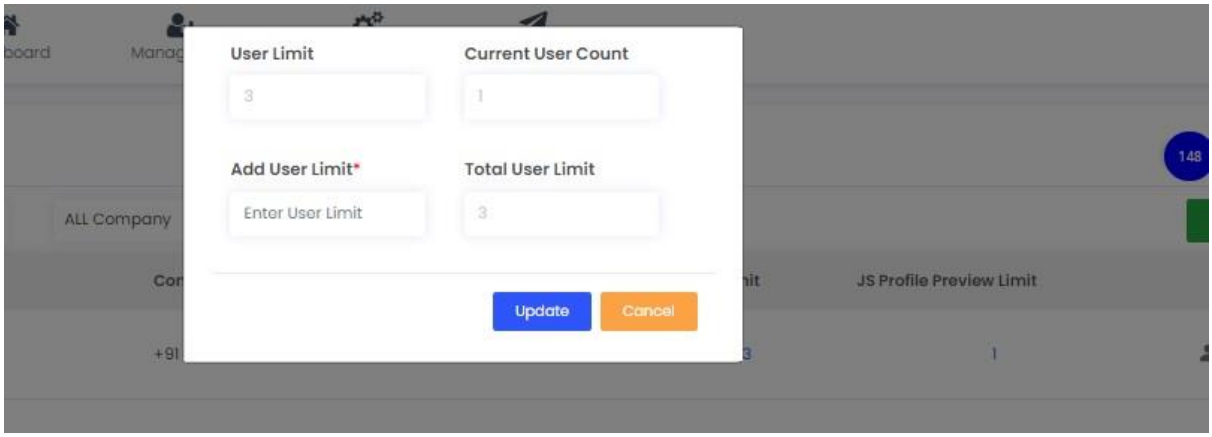

- View all the users. Here user can see the total count of all the jobseekers in the system.
- Admin can download the reports of all the employer users on the system by clicking on the download button.
- Here you can view the date and time when the user was registered.

- Enable/disable the user by clicking on the radio button under actions.
- Can also view the user by applying the filters as active or inactive company.

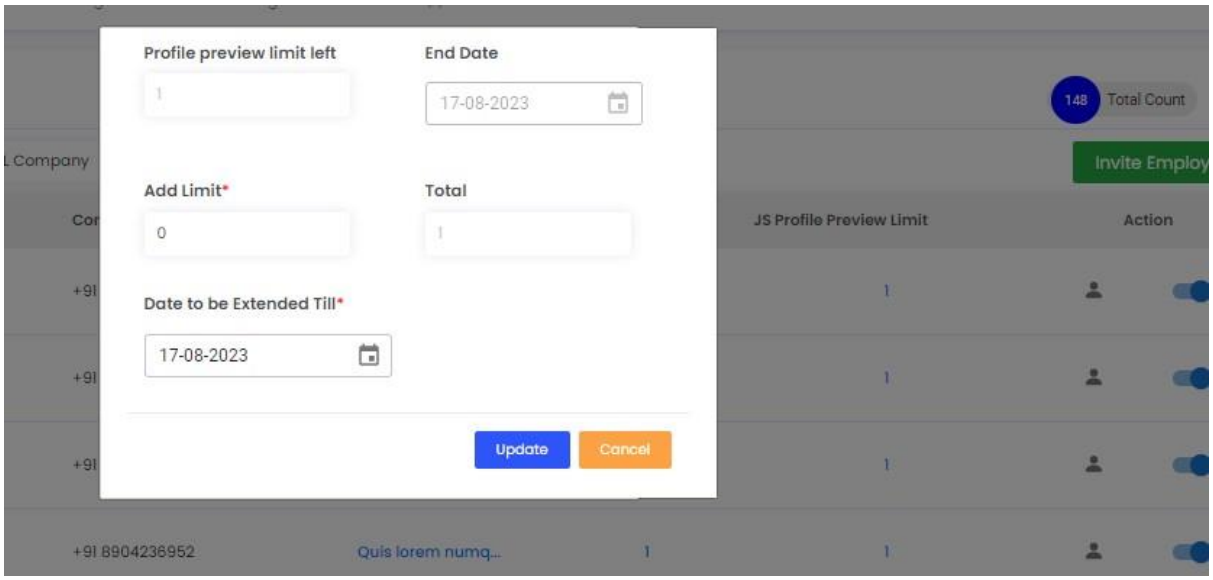

1. Add User Limit

- Admin can set a total number of user limit that employer admin can add into their account.
- Admin can click on the number under the user limit row.
- A popup will appear, here you can set the limit.

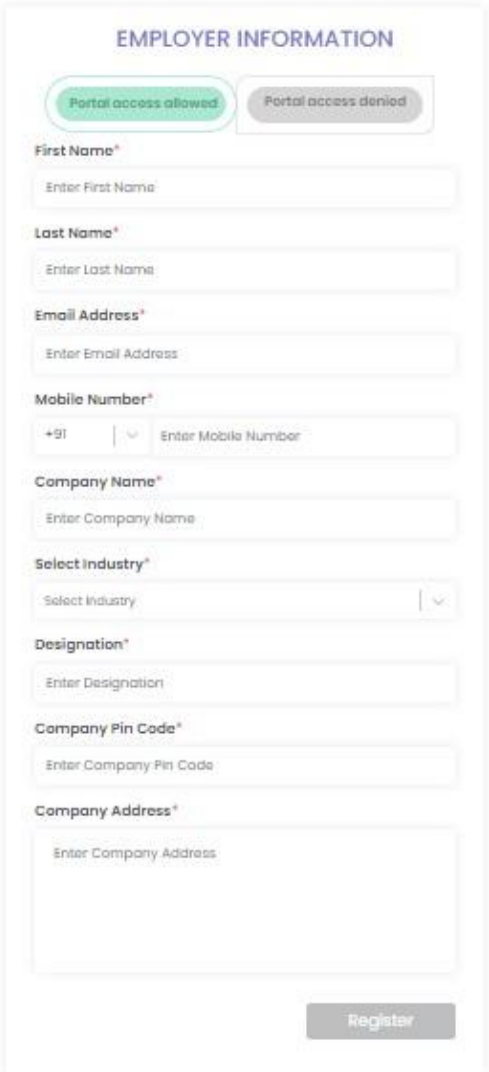

2. Add Profile View Limit

- Admin can set a total number of profile view limit for the employer on viewing the jobseeker's profiles.
- Admin can click on the number under the JS Profile Preview Limit row.
- A popup will appear, here you can add the profile view limit and set the date till when it will be valid.

3. Add Employers

- Admin can register an Employer into the system.
- Can choose to give access to the portal or can only add the user in the system.

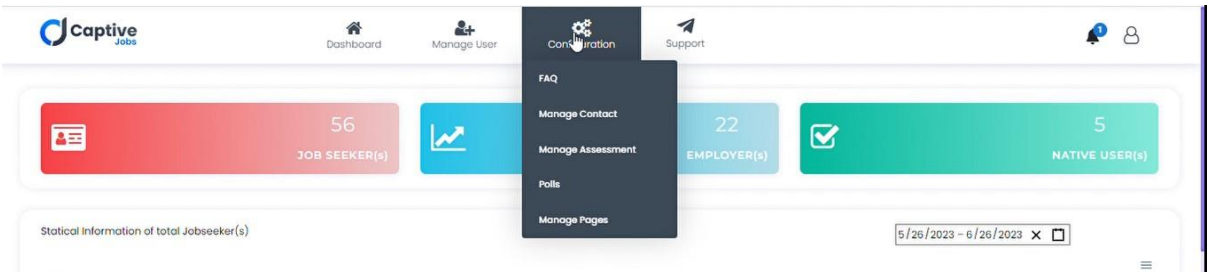

- Once the user is registered in the system and portal access is given, they will receive an email asking to activate their accounts.

8. Configuration:

The configuration section is designed to provide administrators with the flexibility to adapt the Captive Jobs portal to their specific needs and requirements.

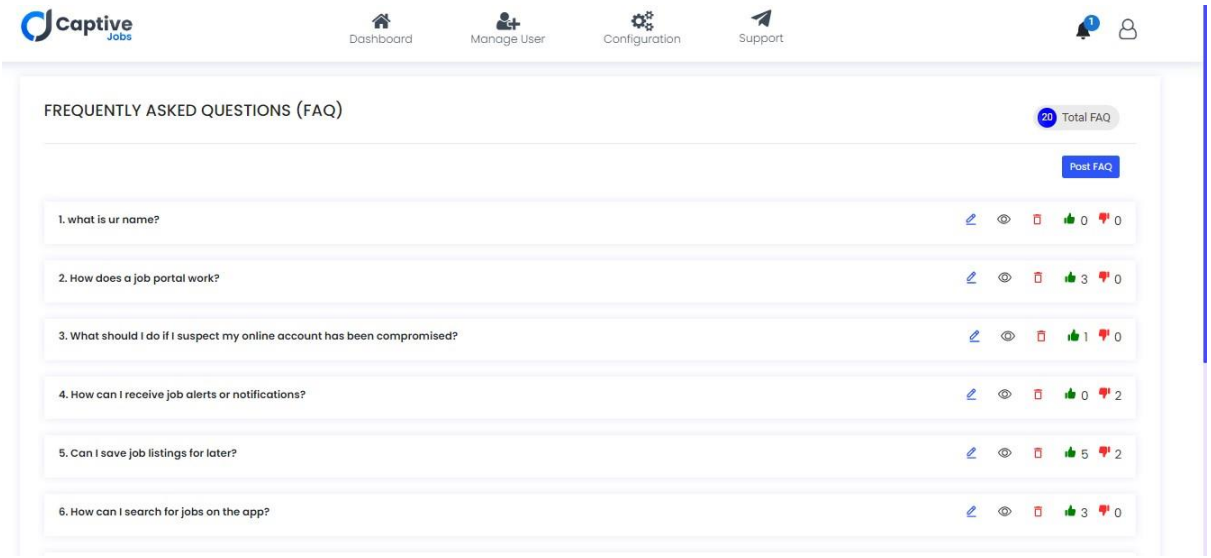

This section for administrators provides a range of options to customize and manage various aspects of the job portal. Here's an overview of the different configurations available:

9.1 FAQs Configuration

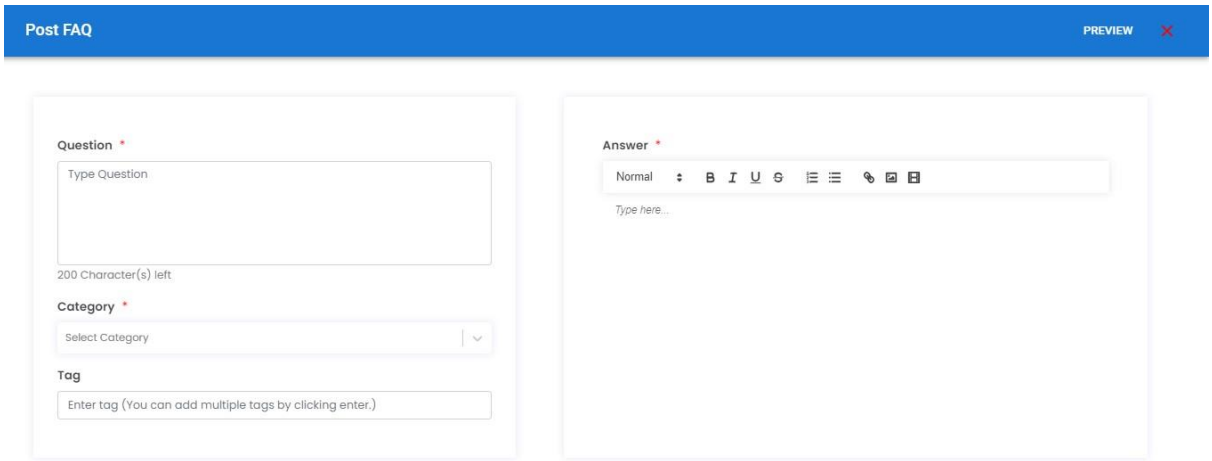

This section allows administrators to configure frequently asked questions (FAQs) to provide helpful information to users.

- Admins can add, edit, or remove FAQs, and ensure the content remains up to date.
- Can also view the like and dislike count for each FAQ.

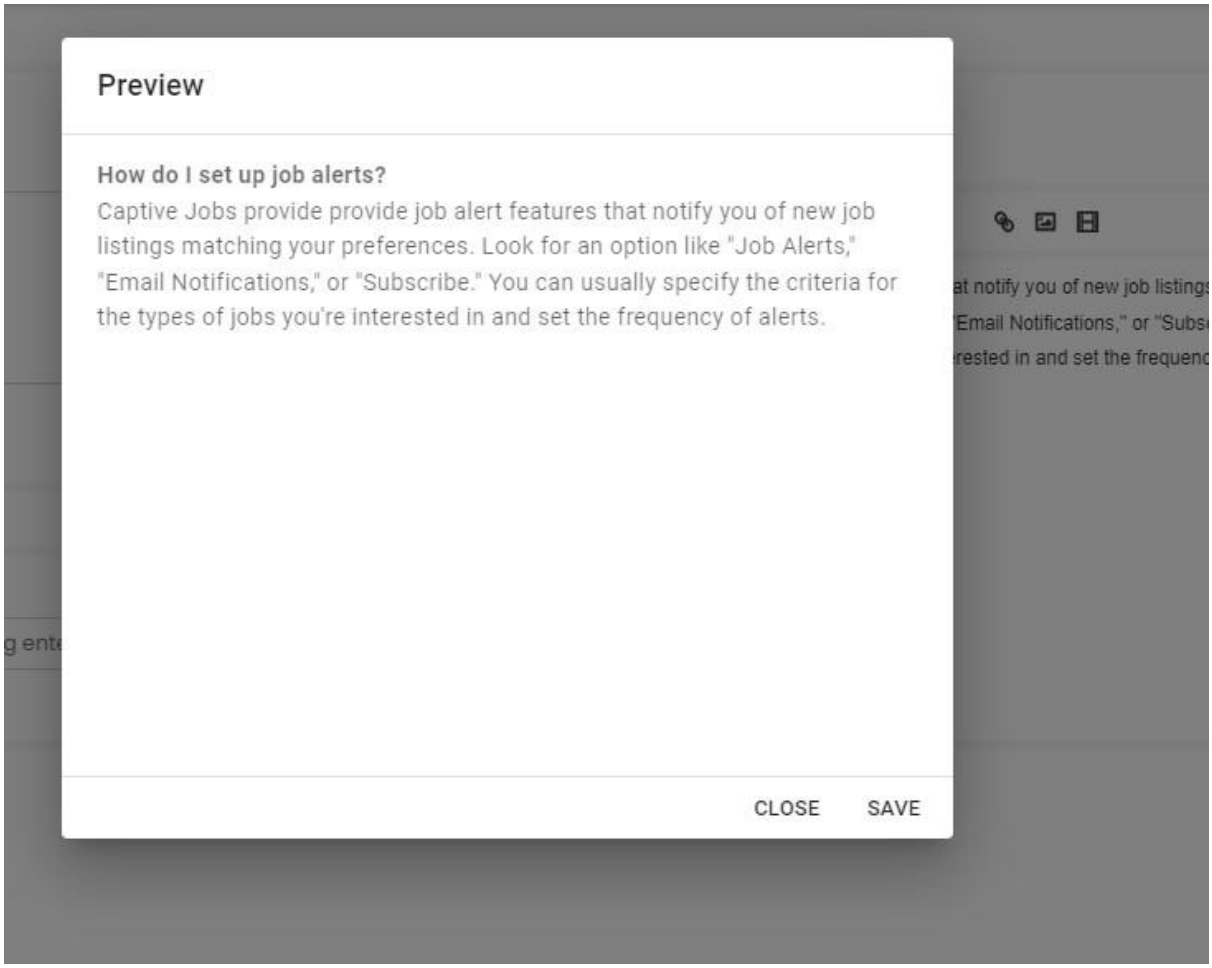

1. Add FAQ

- On click of post FAQ a new page will open here you can post a new FAQ question and answer.

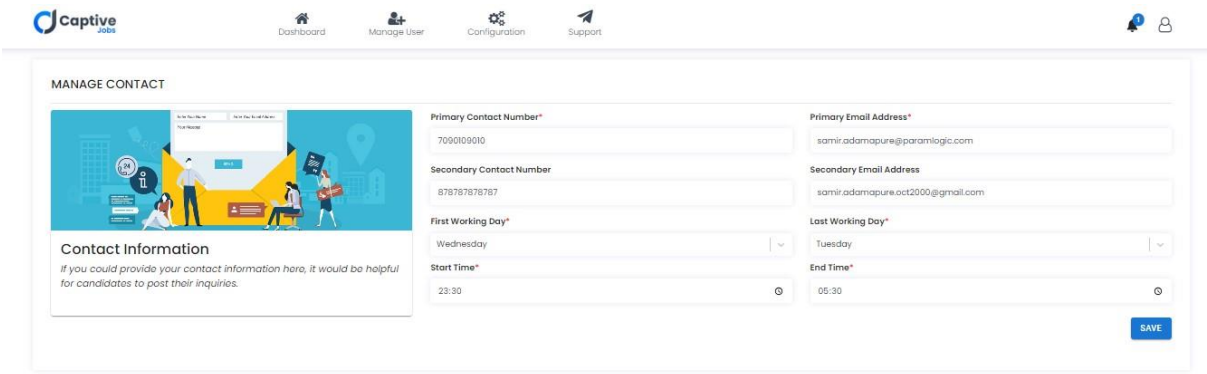

- You can also preview it before posting it.

- Click on save.

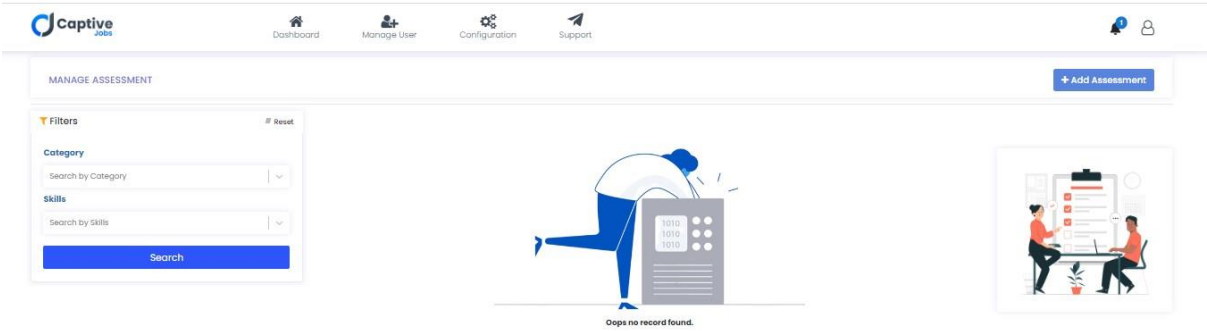

9.2 Support Contact Settings

Admins can configure the support contact information for the portal. This includes specifying the contact email address, phone number, or any other preferred method for users to reach out for assistance or inquiries.

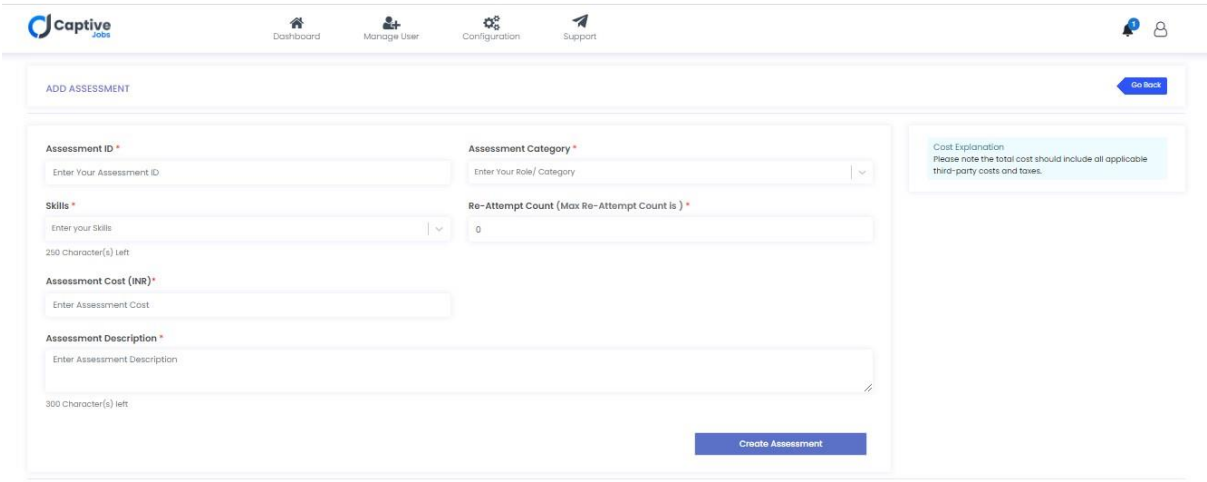

9.3 Assessment Management

This section empowers administrators to manage assessments in portal. Here you can view all the assessments that are active in the system.

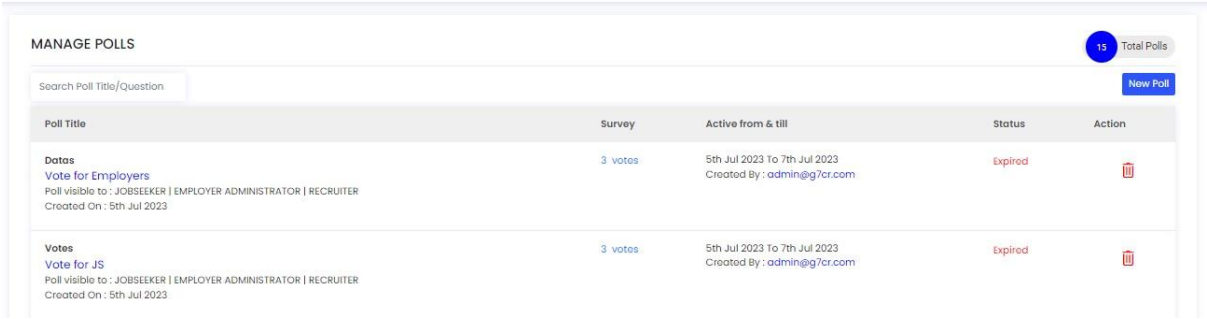

Admins can create and modify assessment tests, set the criteria for scoring, Assessment Cost and determine how results are displayed or shared with users.

9.4 Polls Configuration

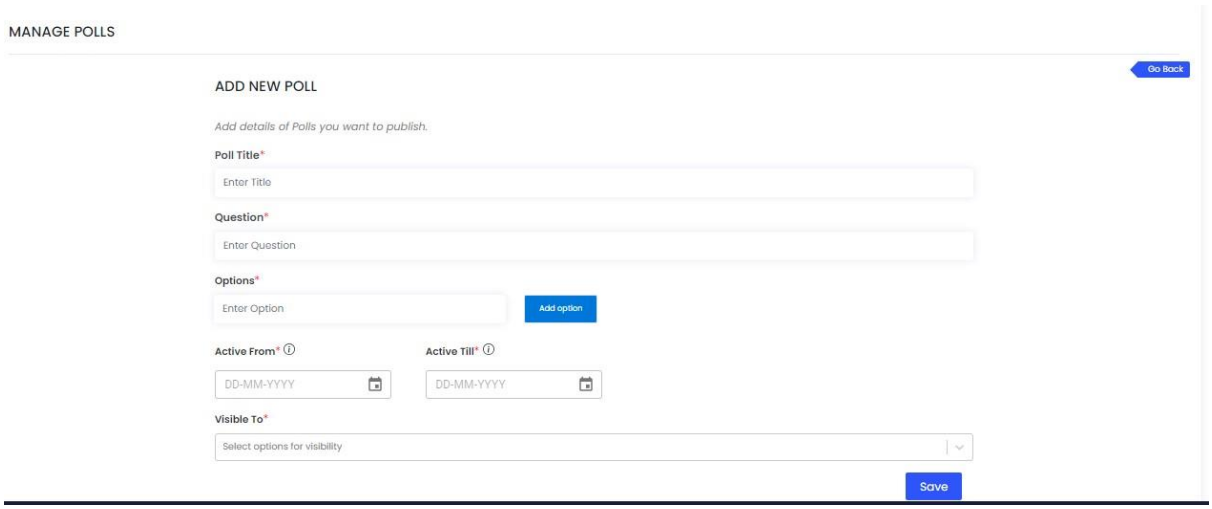

Admins can create and manage polls within the portal to gather user opinions or feedback. Here you can view all the polls and the count.

You can also search for a specific poll.

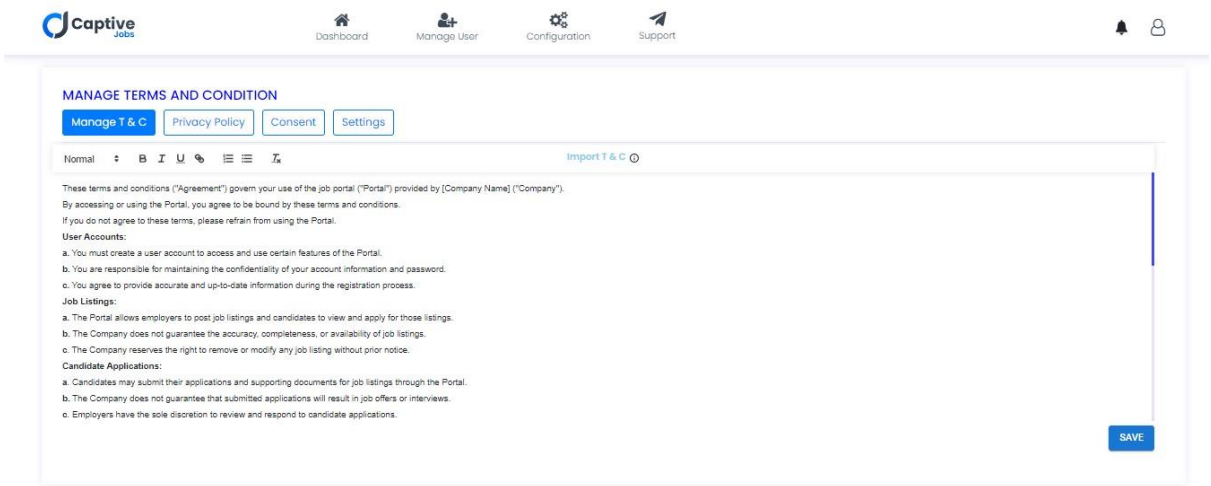

1. Add Poll

This configuration section allows administrators to create new polls, define options for users to choose from, and review the results or analytics to gain insights.

9.5 Page Management

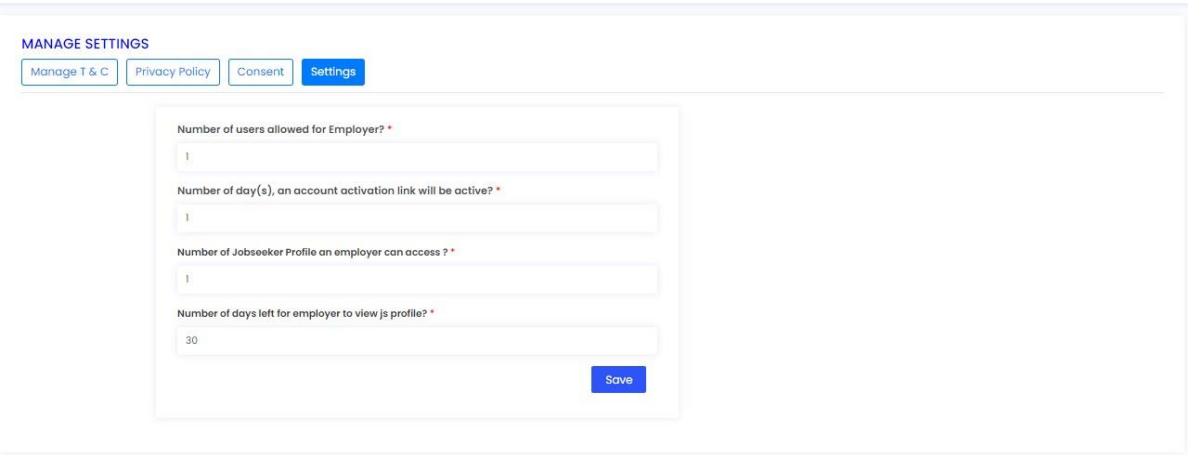

Admins can manage the various static pages within the job portal. This includes creating new pages, editing existing ones, and organizing them to provide a seamless user experience. Examples of such pages are Manage Terms and Conditions, Privacy Policy, and Consent.

1. Manage Settings

Admins can also manage the settings page and can make updates throughout the application.

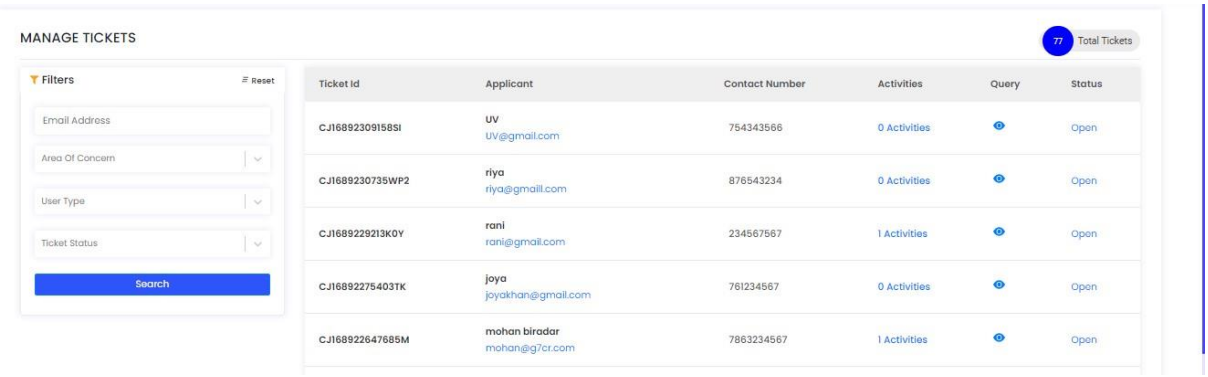

- As an admin you can set limit for all the employers to add users.
- Number of days till when the account activation link will be valid for both the employers and job seekers.
- Set limit on number of job seekers profiles employers can preview.
- Set limit on the days to view the job seekers profiles.

10. Manage Support Tickets

The Manage Support Tickets system will allow the admin to view all raised tickets and access important information such as the ticket ID, applicant ID, contact number, activities, query, and status of each ticket.

1. **Ticket Details:** Here Admins can view all the details about the tickets raised in the application. User can see the total ticket count, view all the tickets, and search through filters for a specific ticket. This ensures that the admin has a complete understanding of the ticket's context.

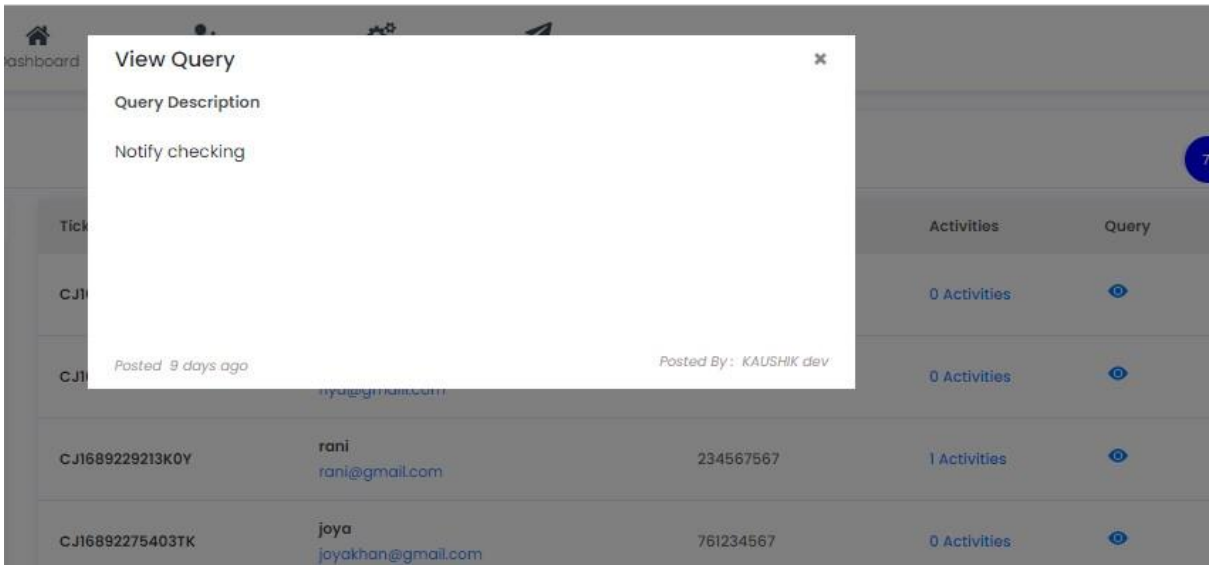

- Admin can change the status of the ticket from open to close by clicking on the “open” option on the status row.
- Once closed it can not be reopned.

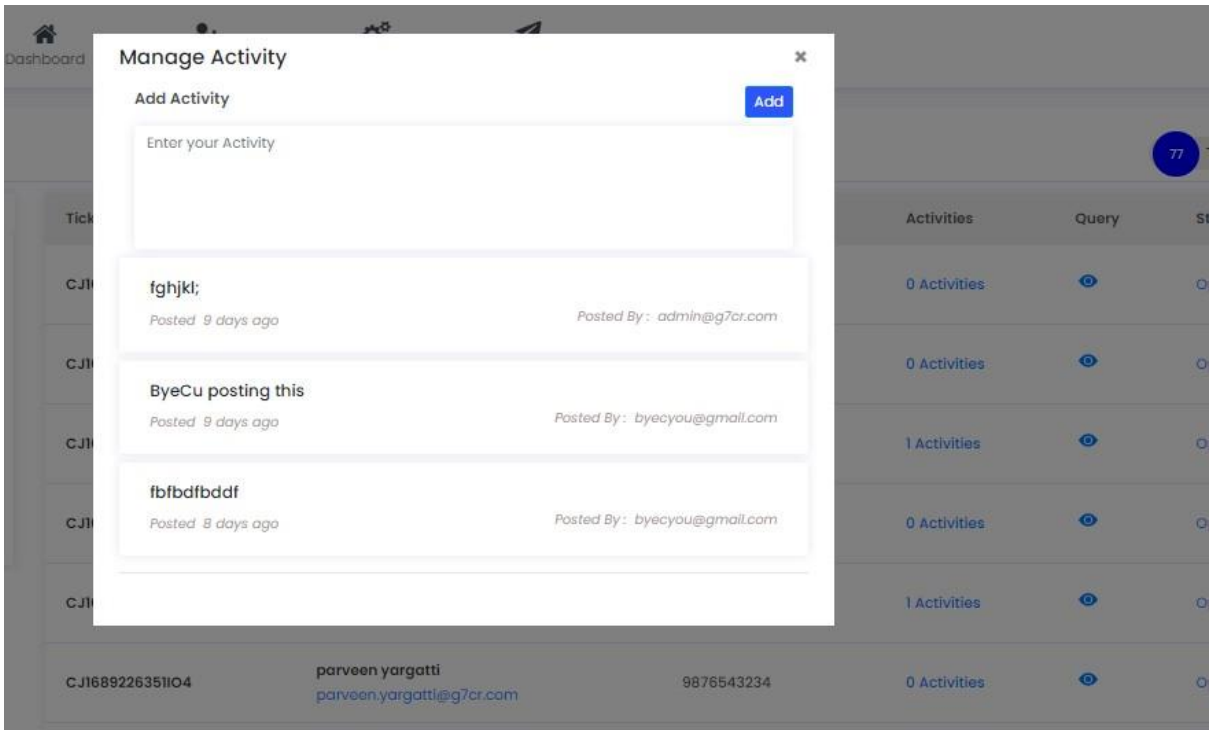

2. View Query

- On click of eye icon you as an admin you can view the detail for each query.

3. Add Activity to a Ticket

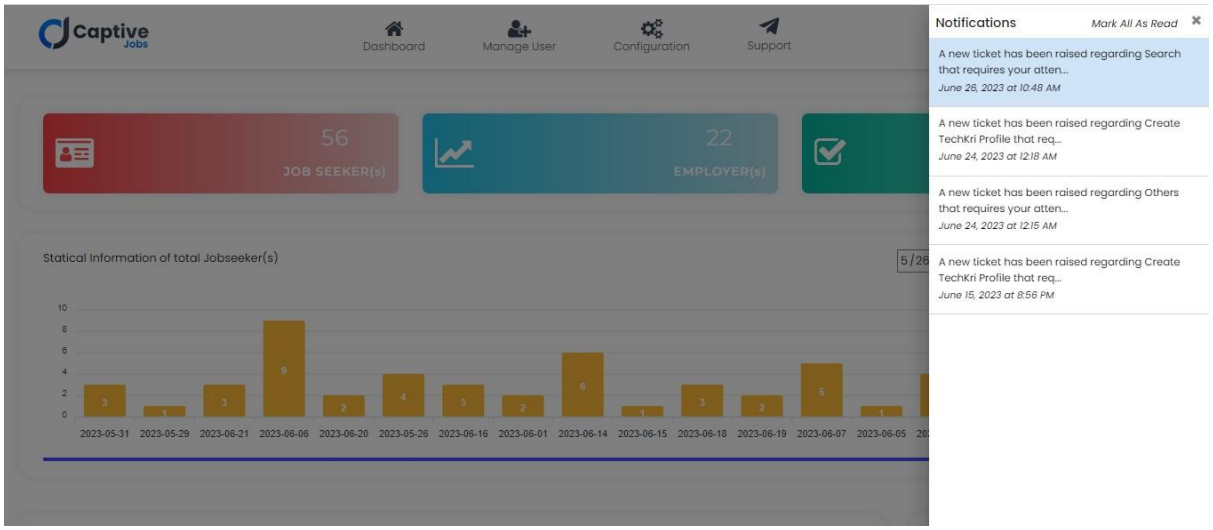

Additionally, the admin will have the capability to add activities to the tickets.

11. Notification

In the notifications section the admin can receive and view important notifications regarding various activities. The notifications are specifically related to new user registrations, new ticket raises, and new assessment purchases. This feature ensures that the admin stays informed about key events and can promptly respond or take appropriate actions. Here's how the notifications section is designed:

The admin should have the ability to mark notifications as read or unread, allowing them to keep track of which notifications they have already reviewed.

12. Reporting and Analytics:

- Admins can utilize the reporting and analytics features to gain insights into the portal's performance.
- Access the "Reports" from the dashboard to generate them, view statistics, or track key metrics.
- These reports can provide valuable information for decision-making and improving the job portal's effectiveness.
- Can download the reports in svg, png and csv format.
- Can view and generate various types of reports as follows.

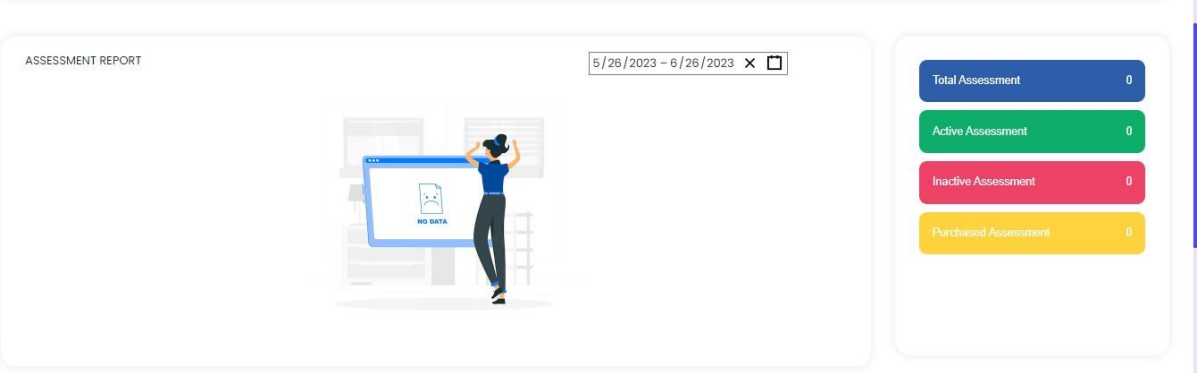

1. Users Report

This section contains the user count wise view for job seekers, employers, and native users. Here you can click on each tab and generate a report for each user type wise.

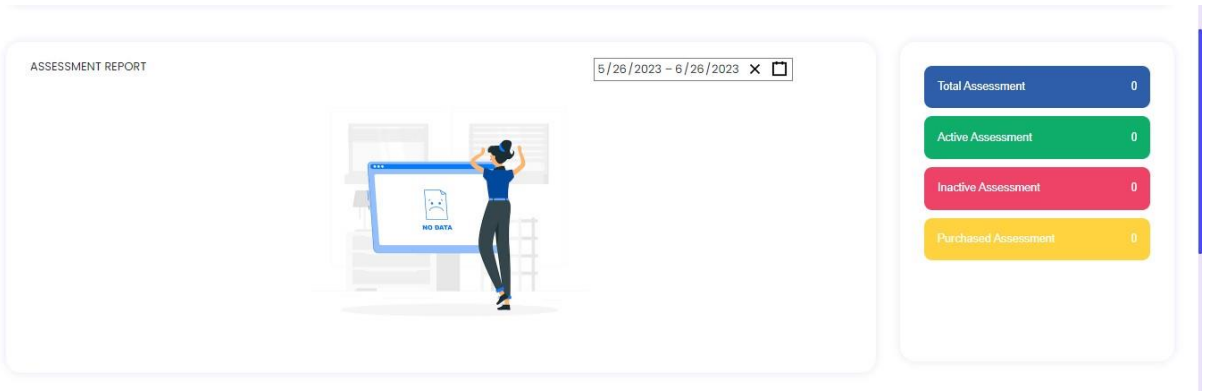

2. Assessment Report

Admin can check for the Total Assessment, Active Assessments, Inactive Assessment, Purchased Assessment and generate reports accordingly.

3. Total Job Posted

Admin can view the total number of posted jobs and how many jobs posted date wise.

4. Tickets Report

Admin can view the total number of raised tickets and how many tickets raised on which date and what's the status of that ticket.

9. Logging Out

- When you have finished using Captive Jobs, it is essential to log out to protect your account.
- Locate the "Logout" option, in the top navigation bar, user profile dropdown.
- Click on the "Logout" option to safely exit the system.
